Kevin Morte i Piferrer

Management Control | Full-Stack ERP Developer

Barcelona y alrededores

Extracto

A dynamic and results-oriented professional with a distinctive career path blending deep expertise in financial control, operational management, and project leadership across diverse sectors, from global corporations to innovative SMEs and public institutions.

My journey has equipped me with a unique ability to bridge the gap between financial performance, operational excellence, and technological implementation.

I began my career in financial markets research at the Barcelona Stock Exchange (BME), building a strong foundation in economic analysis and data interpretation. This quickly led to hands-on economic control at the University of Barcelona, where I meticulously managed budgets and P&L for complex non-degree programs, ensuring compliance and optimal resource allocation.

My transition into the private sector at Lipotec (Lubrizol Group) in purchasing honed my skills in cost management, supply chain coordination, and process efficiency, dealing with global suppliers and critical raw materials. At Cortimarket, I escalated to Project P&L Controller, directly impacting profitability by meticulously overseeing the financial health of varied projects, from hospital installations to public libraries.

As a Project Manager at Ancora Dual, a boutique software consultancy, I became the liaison between technical teams and SME clients, translating complex business needs into actionable ERP and management software solutions. This sharpened my project lifecycle management, stakeholder engagement, and problem-solving capabilities.

Most recently, at Amazon Central Operations EU - On-Road Services, I've been immersed in the fast-paced world of last-mile logistics, supporting real-time dispatch and route management. This role demands immediate problem-solving, data-driven decision-

making, and seamless cross-functional communication, further solidifying my operational prowess.

I thrive on leveraging data-driven insights to identify inefficiencies, optimize processes, and unlock new opportunities for growth and profitability. My core aptitudes include analytical thinking, cross-functional collaboration, strategic financial acumen, and exceptional adaptability. I am passionate about driving continuous improvement and translating strategic visions into tangible operational and financial results.

Experiencia

knote.xyz

Lead Systems Developer & Architect

octubre de 2023 - Present (2 años 9 meses)

- Full-Stack development of modular Enterprise Resource Planner (ERP) system from scratch utilising JavaScript (ES6), Node.js and MongoDB to automate corporate finance and accounting workflows.
- Designed and deployed nosql database models ensuring transactional integrity.
- Developed automated data pipelines that translate complex business logic into real-time financial statements (P&L, Balance Sheet and Cashflow).

Amazon

1 año 7 meses

Business Analytics

enero de 2022 - julio de 2023 (1 año 7 meses)

Barcelona y alrededores

- Designed, developed, and maintained robust SQL queries and ETL processes to extract, transform, and load large-scale operational data from diverse sources (e.g., driver tracking, package scans, route planning systems).
- Ensured data integrity and accuracy by performing routine data quality checks and implementing validation procedures for critical datasets.
- Automated data pipelines using scripting languages (e.g., Python, SQL) to improve efficiency and reduce manual effort in data preparation.

- Developed and maintained highly interactive and user-friendly dashboards (e.g., Amazon QuickSight) to visualize key performance indicators (KPIs) and provide real-time operational insights.
- Created standardized and ad-hoc reports for various stakeholders, including senior leadership, on key metrics such as on-time delivery, cost per package, route efficiency, and driver performance.
- Conducted in-depth analysis of operational data to identify root causes of performance variances (e.g., delivery delays, cost overruns, missed service level agreements, DNR's).
- Translated complex data findings into clear, concise, and compelling narratives for non-technical audiences, influencing business decisions.
- Collaborated with operations teams to understand business requirements, pain points, and opportunities for process improvement within the last-mile delivery network.
- Participated in the development and maintenance of forecasting models (e.g., using regression, statistical methods) for key operational variables such as package volume, driver demand, and delivery capacity.
- Partnered closely with cross-functional teams, including Operations, Planning, Transportation, and Technology, to provide analytical support and drive data-informed decision-making.
- Presented findings and recommendations to senior leadership, influencing strategic direction and investment in operational improvements.

Associate - On Road Services

enero de 2022 - marzo de 2022 (3 meses)

Barcelona y alrededores

Resolved real-time operational issues impacting delivery routes, including traffic disruptions, weather impediments, and unforeseen logistical challenges. Analyzed complex scenarios quickly and made sound, data-driven judgments to mitigate delivery delays and maintain service levels. Proactively identified and addressed potential roadblocks to delivery efficiency, minimizing disruptions and maximizing customer satisfaction.

Utilized proprietary Amazon software and Microsoft Office Suite to track key performance indicators (KPIs) and generate comprehensive operational reports.

Analyzed delivery data to identify trends, pinpoint areas for improvement, and support strategic decision-making.

Contributed to the development and refinement of data-driven insights to enhance overall last-mile delivery performance.

Fostered strong collaborative relationships with internal departments (e.g., Delivery Station teams, Planning, Transportation, Last Mile Tech) and external stakeholders (e.g., Delivery Service Partners, suppliers).

Communicated effectively, both written and verbally, to resolve logistical issues, disseminate critical information, and ensure alignment across diverse teams.

Acted as a primary point of contact for operational queries, providing timely and accurate responses to maintain smooth workflows.

Adhered rigorously to established standard operating procedures (SOPs) to ensure consistent and high-quality operational output.

Identified opportunities for process optimization and contributed to the implementation of new workflows to enhance efficiency and reduce costs.

Ona Hotels & Apartments

Management Control

agosto de 2018 - septiembre de 2021 (3 años 2 meses)

Barcelona, Cataluña / Catalunya, España

- Prepared and analyzed monthly, quarterly, and annual financial statements (e.g., Income Statements, Balance Sheets, Cash Flow Statements) for multiple hotel properties.

- Monitored key performance indicators (KPIs) specific to the hospitality industry (e.g., RevPAR - Revenue per Available Room, ADR - Average Daily Rate, Occupancy Rate, GOPPAR - Gross Operating Profit per Available Room) to assess financial health and operational efficiency of properties.

- Provided strategic recommendations to hotel management and executive leadership based on financial analysis to improve profitability, reduce costs, and optimize revenue streams.

- Assisted in the development and consolidation of annual operating budgets for individual hotels and the overall group.

- Acted as a key liaison between the Controlling Department and the internal tech Department, specifically concerning the Group's proprietary ERP system.

- Identified opportunities to leverage the ERP system for enhanced financial reporting, data accuracy, and operational efficiency within controlling processes.
- Collaborated with the tech team to define requirements for ERP system enhancements, reports, or data integrations to better serve controlling and business analysis needs.
- Analyzed cost structures across various hotel departments (e.g., F&B, Rooms, Maintenance) to identify cost-saving opportunities and improve operational profitability.
- Monitored inventory levels and procurement processes within the ERP, analyzing consumption patterns to optimize stock levels and reduce waste for food, beverages, and other supplies.
- Leveraged strong analytical skills to extract and analyze large datasets from the ERP and other operational systems to provide insights into business performance.
- Developed custom reports and dashboards using BI tools to visualize financial and operational trends for management review.
- Assisted in coordinating internal and external audits, providing necessary documentation and explanations.

AncoraDual

Jefe de proyectos

enero de 2020 - junio de 2020 (6 meses)

Barcelona, Cataluña, España

- Served as the primary point of contact for multiple small to medium-sized enterprise (SME) clients, translating complex business needs into clear, actionable technical requirements for software development.
- Conducted in-depth client interviews to gather and meticulously document functional and non-functional requirements for custom ERP and management software solutions.
- Managed client expectations throughout the project lifecycle, ensuring alignment between client vision and technical feasibility.
- Facilitated regular client meetings, providing transparent updates on project progress, milestones, and potential risks.

- Liaised directly with a lean team of engineers and designers, effectively communicating client requirements and providing necessary context to ensure accurate and efficient software development.
- Translated technical concepts and challenges from the development team into understandable terms for non-technical clients.
- Managed the project backlog, prioritized tasks, and assigned work to the technical team to ensure timely delivery within agile or hybrid methodologies.
- Developed comprehensive project plans, including scope definition, detailed timelines, resource allocation, and budget tracking for each client engagement.
- Oversaw the full software development lifecycle from initial concept and design to development, testing, deployment, and post-implementation support and ensured a full integration of the solution into client environments.
- Coordinated and facilitated User Acceptance Testing (UAT) sessions with clients, gathering feedback and ensuring the deliverable met their operational needs.
- Prepared and presented regular project status reports, progress updates, and budget analyses to both clients and internal management.
- Maintained comprehensive project documentation, including requirements specs., design documents, and meeting minutes.
- Mediated discussions and resolved conflicts between client expectations and technical constraints.

CortiMarket

Business Controller

julio de 2016 - junio de 2018 (2 años)

Barcelona, Cataluña / Catalunya, España

- Managed the end-to-end financial control of multiple simultaneous projects (e.g., hospital installations, public library fit-outs), ensuring adherence to budget and maximizing profitability.
- Developed and maintained detailed Profit & Loss (P&L) statements for each project, tracking revenues, direct costs (materials, labor), and indirect expenses.
- Conducted regular cost analysis and variance reporting against project budgets, identifying discrepancies and recommending corrective actions to project manager.
- Implemented cost-saving initiatives by analyzing material procurement, labor allocation, and operational efficiencies across projects.

- Prepared comprehensive financial reports on project performance for management, highlighting key financial metrics and deviations.
- Monitored cash flow for individual projects, ensuring timely invoicing and collection to support operational liquidity.
- Contributed to the overall company's financial reporting by consolidating project-level data into broader P&L statements.
- Assisted with general accounting tasks, including ledger reconciliation, journal entries, and month-end close procedures to ensure accurate financial records.
- Managed banking relationships and executed financial transactions, including payments, receipts, and bank reconciliations.
- Collaborated closely with stakeholders to gather accurate financial data and provide financial insights on project feasibility and progress.
- Communicated financial performance and potential risks effectively to non-financial stakeholders, facilitating informed decision-making.
- Supported the owner with financial information critical for strategic planning and business development.
- Identified inefficiencies in project costing, billing, or expense tracking processes and proposed improvements to enhance financial accuracy and operational workflow.
- Assisted in developing and standardizing templates for project budgeting and cost tracking to improve consistency and control.

Lipotec Srl

Junior Buyer

enero de 2016 - junio de 2016 (6 meses)

Gavá, Cataluña / Catalunya, España

- Assisted senior buyers in managing relationships with a diverse portfolio of domestic and international suppliers of raw materials, packaging components, and services for cosmetic ingredient production.
- Supported the negotiation process by gathering market intelligence, preparing supplier performance reports, and analyzing pricing proposals.
- Processed purchase requisitions and generated purchase orders (POs) accurately and efficiently, ensuring adherence to company policies and supplier agreements.
- Communicated daily with suppliers regarding order status, delivery schedules, and invoice discrepancies to ensure timely and accurate deliveries.

- Monitored and tracked purchase orders from creation to delivery, ensuring on-time arrival of critical raw materials to support production schedules.
 - Coordinated with supply team to manage inbound shipments, resolve receiving issues, and optimize inventory flow.
 - Addressed discrepancies in received goods by liaising with suppliers, quality control, and production departments.
 - Reconciliated invoices against purchase orders and delivery notes, resolving billing discrepancies with suppliers and the accounting department.
 - Maintained accurate purchasing records and updated supplier databases within the company's ERP (SAP).
 - Supported efforts to identify cost-saving opportunities by comparing supplier prices, evaluating alternative materials, and optimizing order quantities.
 - Ensured accurate data entry of purchasing information into the ERP, maintaining data integrity for financial and inventory tracking.
-
- Collaborated closely with production planning to understand material requirements and ensure sufficient stock levels to prevent manufacturing delays.
 - Liaised with the R&D team regarding new ingredient sourcing and material specifications for product development.
-
- Conducted preliminary research on new potential suppliers and alternative materials to support sourcing initiatives for cosmetic ingredients.

Universitat de Barcelona

Management Control

diciembre de 2013 - diciembre de 2015 (2 años 1 mes)

Barcelona, Cataluña / Catalunya, España

- Developed, monitored, and managed budgets for a portfolio of diverse non-degree academic programs, including specialized courses, postgraduate diplomas, and research grants.
 - Ensured adherence to allocated budgets, identifying potential overruns or savings and recommending corrective actions to academic departments and program directors.
 - Assisted program coordinators in forecasting revenue and expenditure for new or ongoing educational initiatives.
-
- Managed the financial lifecycle of each program, including tracking income from tuition fees, grants, and other funding sources, as well as controlling operational expenses.

- Processed invoices, managed payments to suppliers, lecturers, and researchers, ensuring compliance with university financial policies and public procurement regulations.
- Reconciled financial transactions and accounts related to each program, ensuring accuracy and completeness of financial records.
- Ensured strict adherence to university financial regulations, public sector accounting standards, and specific guidelines for grants and external funding.
- Maintained detailed financial documentation for audit purposes and assisted in internal and external financial audits.
- Prepared regular financial reports for university management, academic departments, and external funding bodies on the economic performance of studies and projects.
- Analyzed financial data to identify trends and provide insights into program profitability or efficiency.
- Presented financial information clearly to non-financial stakeholders, supporting decision-making for program development and resource allocation.
- Served as the primary financial liaison for academic departments, program directors, and external partners.
- Communicated complex financial policies and procedures to academic staff, ensuring understanding and compliance.
- Coordinated with other university departments (e.g., accounting, finance, hr) on financial matters pertinent to specialized programs.

Instituto BME (Bolsas y Mercados Españoles) - Grupo BME

Trainee - Stagiaire

septiembre de 2012 - marzo de 2013 (7 meses)

Barcelona, Cataluña / Catalunya, España

- Collected, compiled, and organized vast datasets related to financial market performance (e.g., stock prices, trading volumes, market indices, economic indicators) from various internal and external sources.
- Performed preliminary statistical analysis on market data to identify trends, patterns, and anomalies relevant to financial market behavior.
- Utilized financial databases and statistical software (e.g., Excel, basic R and Python, financial terminals) to process and interpret raw data.
- Usage and command programming of Reuter's and Bloomberg's consoles

- Assisted senior economists and researchers in preparing economic and financial reports, presentations, and publications on market trends, sector performance, and macroeconomic developments.
- Contributed to the writing of daily, weekly, or monthly market commentaries by providing supporting data, charts, and initial observations.
- Conducted literature reviews and gathered information on specific economic topics or market segments to support ongoing research projects.
- Monitored domestic and international financial markets, keeping abreast of key economic news, regulatory changes, and events impacting the stock exchange.
- Tracked performance of listed companies and different market segments, providing updates to the research team.
- Maintained and updated internal databases with current economic and financial information, ensuring data accuracy and accessibility for the research team.
- Organized research materials, articles, and reports for easy retrieval and future reference.
- Gained exposure to the operations of a regulated financial market, understanding the interplay between trading, clearing, and settlement.
- Supported various ad-hoc requests from internal departments (e.g., listings, trading operations) by providing market data or specific research findings.

Sonostudi

Administrativo

septiembre de 2006 - junio de 2007 (10 meses)

Barcelona, Cataluña, España

- Implemented SME regulations, establishing efficient accounting procedures and compliance frameworks.
- Managed inventory flow to ensure operational efficiency and reduce bottlenecks.
- Resolved client challenges under pressure and tight deadlines, ensuring positive outcomes.
- Handled treasury operations, including liquidity forecasting and cash flow management.
- Monitored liquidity positions and provided actionable insights from a cash flow perspective.

·Updated and maintained CRM software to enhance client relationship management and operational tracking.
